Kelvix Launches AC Fizzix: A Driverless, Plug-and-Play Linear Fixture for Easy 120V Lighting Integration

PORTLAND, OR — August XX, 2025 — Kelvix, a trusted innovator in architectural LED lighting, proudly introduces AC Fizzix, a new driverless 120V linear fixture engineered to simplify lighting design and installation across residential and commercial projects. Designed for enhanced versatility and speed, AC Fizzix eliminates the need for remote power supplies, enabling seamless, long-run lighting with plug-and-play ease.

Where Driverless Simplicity Meets Powerful Performance

Available in a variety of lengths (6"-48") and color temperatures (2700K-5000K), AC Fizzix offers up to 65.6 feet of continuous light per power feed. It integrates effortlessly into undercabinet, cove, and task lighting applications with surface mounting clips and a smart suite of accessories, including corner connectors, jumpers, and power leads. ETL listed for dry and damp locations, this system brings installer-friendly performance with a polished, architectural aesthetic.

Ready for Real-World Projects

"AC Fizzix was created to remove friction in the field," said Rick Earlywine, CEO of Kelvix. "We heard from our partners that time and simplicity matter, and we responded with a fixture that's fast to install, beautifully engineered, and ready for the real-world needs of both specifiers and contractors. It's one more way we're delivering lighting that works harder, for everyone."
