Kelvix Unveils Complete Theater & Auditorium Lighting Series Designed for Safety, Style, and Seamless Integration

PORTLAND, OR — April 3, 2025 — Kelvix, a leader in architectural LED lighting, is proud to announce the launch of its most comprehensive product series yet, engineered specifically for theater, auditorium, and performing arts venues. This new lineup of lighting channels delivers a refined balance of safety, performance, and aesthetic precision, ensuring every step, aisle, and wall is seamlessly illuminated without distracting from the performance.

From audience entry to final curtain, Kelvix’s latest offerings are designed to elevate mobility in low-light environments while complementing the architectural beauty of world-class entertainment spaces.

“Great theater lighting goes beyond the stage. It guides, protects, and enhances the entire experience,” said Wendy Kaplan, Sales Director at Kelvix. “This series was thoughtfully developed with designers and venue operators in mind, offering versatility, customization, and seamless performance.”

Featured Solutions Built for Every Angle of the Theater Experience

Step Lighting

- CH-224 – A sleek channel for downward step illumination, highlighting elevation changes with enhanced safety and aesthetics.
- CH-226 – Dual-direction channel for both upward and downward lighting on stairs.
- CH-646 – Brighter upward lighting paired with a softer downward glow for a theatrical, ambient effect.

Aisle Lighting

- CH-723 – Designed for carpet-to-carpet transitions, delivering clean, consistent aisle lighting.
- CH-724 – Maintains similar functionality to the CH-723 with a carpet-to-hard surface design.
- CH-725 – Engineered for carpet-to-wall applications, ideal for continuous edge lighting.
- CH-608 – A unique profile offering an alternate approach to carpet transitions.
- CH-0200 – A walkover-rated channel enabling uninterrupted lines of light from floor to ceiling.

Wall Indirect Lighting

- CH-241 – An extruded aluminum mounting channel offering bold up/down wall illumination.
- CH-0010 – A trimless, mud-in solution for flush, modern lighting integration.

Indirect Lighting

- CH-0007 – Offers long, continuous runs with flexible connectors for indirect aisle or architectural lighting.

Tape Lighting

- Uniform Thinline Outdoor – Ideal for theaters needing nostalgic design and long, durable runs with weather-ready reliability.

Lighting That Does More Than Illuminate

These new products were built with a clear purpose: to improve wayfinding and mobility in low-light, high-traffic venues without compromising on form. Available in custom finishes and lengths, each channel allows designers to create visually stunning yet safety-conscious environments that leave lasting impressions on guests.
